PROFESSIONAL SUMMARY

Backend Engineer with 3 years of experience building scalable Node.js applications and REST APIs, now expanding into Generative AI and LLM-powered systems. Hands-on experience with LangChain, vector databases, and RAG-based applications. Strong foundation in clean architecture, database optimization, and cloud-native backend services. Passionate about building reliable, production-ready systems combining traditional backend engineering with modern AI capabilities.

TECHNICAL SKILLS

- **Backend:** Node.js, Express.js, REST APIs, Clean Architecture, PM2
- **Frontend:** React, JavaScript, TypeScript
- **Databases:** PostgreSQL, MySQL, MongoDB
- **GenAI / LLM:** LangChain, RAG pipelines, Vector Databases (FAISS/Chroma), OpenAI API
- **Cloud & DevOps:** AWS Lambda, Serverless Framework, Docker, Git
- **Tools:** Postman, GitHub, CI/CD basics

EXPERIENCE

Website Developers India Pvt Ltd

Mar 2024 – Present

Node.js Developer

Mumbai, India

- Designed and implemented scalable REST APIs using Node.js following Clean Architecture principles, ensuring high maintainability and zero downtime deployments.
- Collaborated closely with frontend teams to integrate backend services seamlessly with React-based applications.
- Optimized MySQL queries and indexing strategies, reducing query execution time by nearly 30%.
- Developed event-driven serverless functions using AWS Lambda to improve performance and reduce infrastructure costs.

Wow Rooms Pvt Ltd

Sep 2023 – Feb 2024

Backend Developer

Mumbai, India

- Contributed to backend development using Node.js and Express.js, building and maintaining RESTful APIs.
- Implemented CRUD operations and relational data models using MySQL for production business use cases.
- Performed API testing, debugging, and validation using Postman to ensure reliability and correctness.

PROJECTS

RanOutOf — Smart Grocery Management App

Jun 2025

Backend / Product Engineering

Node.js, PostgreSQL, Notifications

- Built a smart grocery inventory system with item status indicators (red/yellow/green), shared lists, and expiry-based alerts.
- Designed and optimized PostgreSQL schemas to efficiently manage inventory and usage history.
- Integrated email and push notifications to alert users about low or expired items, improving user engagement.

Tanami Capital — Investment Platform

Feb 2025

Backend Systems

Node.js, PostgreSQL, Secure APIs

- Developed backend services for mobile and web platforms, including a role-based admin dashboard.
- Built secure APIs for managing investments, portfolios, and transaction workflows for HNI clients.
- Focused on data security, access control, and performance for financial-grade applications.

LLM-powered Knowledge Chatbot

2025

GenAI / RAG System

LangChain, Vector DB, OpenAI API

- Developed a Retrieval-Augmented Generation (RAG) chatbot that answers user queries based on private document data.

- Implemented document chunking, embedding generation, and semantic retrieval using vector databases.
- Integrated OpenAI APIs via LangChain to generate grounded, context-aware responses.

AI Agent for Task Automation

2025

Agentic AI

LangChain Agents

- Built an AI agent capable of executing multi-step tasks such as document lookup, summarization, and decision routing.
- Implemented tool calling and prompt strategies to improve agent reliability and output quality.

EDUCATION

Tolani College of Commerce

2020 – 2023

Bachelor of Science in Information Technology (BSc IT)

Mumbai, India

- CGPA: 7.82

Bhavan’s College

2019 – 2020

Higher Secondary Certificate (HSC)

Mumbai, India

- Percentage: 62.15%

D.A.V. Public School

2017 – 2018

Secondary School Certificate (SSC)

India

- Percentage: 87.80%

EXTRACURRICULAR & INTERESTS

- Participated in multiple 5KM marathons; secured 2nd and 3rd place finishes, demonstrating discipline and consistency.
- Strong interest in personal finance, wealth creation, and financial independence.
